## **Precipitation watch:**

### **Rough River Lake Stilling Basin Modification update**

**ROUGH RIVER LAKE, Ky.** — The the ongoing Rough River Dam improvements and repair project of reconstructing of the stilling basin are continuing as scheduled. During this phase of construction, the project is unable to discharge water from the outlet works so the lake level will continue to rise until the construction is completed in mid-January.

The U.S. Army Corps of Engineers Rough River Lake project office would like to remind the public that low lying roads or other adjacent areas within flowage easement areas may be inundated. All adjacent property owners are advised to monitor their private property and structures located on fee and flowage easement lands.

Daily lake levels at Rough River Lake can be monitored on the internet at [www.lrl.usace.army.mil/rrl](http://www.lrl.usace.army.mil/rrl) After accessing the web page, click on Lake Levels at the bottom of the page.

For questions, please contact the Public Affairs Office at 502-315-6766/6770, or visit [www.lrl.usace.army.mil](http://www.lrl.usace.army.mil)
